

Intrigo Systems Named to *Food Logistics*' 2017 FL100+ Top Software and Technology Providers List

FREMONT, CA — DECEMBER 15, 2017 — *Food Logistics*, the only publication exclusively dedicated to covering the movement of product through the global food supply chain, has named Intrigo Systems to its **2017 FL100+ Top Software and Technology Providers** list.

“New developments and innovations in the software and technology sector are making sizeable impacts on the global food supply chain,” notes Lara L. Sowinski, editorial director for *Food Logistics* and its sister publication, *Supply & Demand Chain Executive*. “The result is a greater visibility, improved regulatory compliance, enhanced shelf life for perishables, and the emergence of a more proactive and nimble food supply chain that benefits both the food industry and its logistics partners, as well as the end consumer.”

The annual **FL100+ Top Software and Technology Providers** list serves as a resource guide of software and technology providers whose products and services are critical for companies in the global food and beverage supply chain.

“The food and beverage industry serves the fundamental needs of our society. Getting the products to the markets, cafeterias, restaurants and end consumers in a timely and efficient manner, while complying with guidelines and regulations requires a sophisticated supply chain and logistics that needs to be planned and executed with a high level of precision. The Intrigo team is honored to be listed amongst other esteemed companies in the FL100 List,” said Kanth Krishnan, Chief Customer Officer of Intrigo Systems.

Companies on this year's **2017 FL100+ Top Software and Technology Providers** list will be profiled in the November/December 2017 issue of *Food Logistics*, as well as online at www.foodlogistics.com.
