

Intrigo Transforms the Supply Chain for CP Kelco

FREMONT, CA—June 21, 2018 — Intrigo Systems, a leading provider of enterprise and cloud solutions in e-commerce, supply chain and procurement, is pleased to announce the successful solution of a new supply chain process that has significantly improved CP Kelco operations worldwide. CP Kelco is a leading global producer of specialty hydrocolloids used in foods and beverages, consumer and household products, and industrial applications.

“CP Kelco’s advanced manufacturing capabilities depend on a reliable and robust planning process that can adapt quickly to changing market needs,” said Stephen Sullivan, Sr. Director, Global Supply Chain and Quality Management. “Intrigo brings together in-depth knowledge of SAP® solutions with best practices gleaned from their vast experience working with leading global corporations. With Intrigo’s rapid delivery of this solution, our planning cycle times have been slashed, and we now have unprecedented visibility into our supply chain.”

Using the Agile/Scrum project methodology, Intrigo was quickly able to align CP Kelco’s business processes in the supply chain and efficiently create an onshore/offshore model to accommodate their regional customer demands. Key benefits of the Intrigo solution include:

- The development of a single, heuristics-based model for demand management as well as supply planning.
- The ability to make intelligent, data-driven decisions to manage sourcing and capacity.
- A significant reduction in planning cycle times that enabled near real-time alerts for shortages and capacity constraints.

“CP Kelco no longer has to rely on spreadsheets and the resulting delayed decision making to run their business,” said Pushpinder Singh, Solution Architect of Intrigo Systems. “Deployed in just 14 weeks, Intrigo’s solution has helped CP Kelco drastically improve their overall global planning program and streamline their manufacturing process.”

About Intrigo Systems:

Intrigo Systems, Inc. is a SAP partner and a leading provider of Advisory, Implementation, and Managed Services.
